Features

The power system of ZD220 series bulldozer is equipped with CUMMINS NT855-C280 (BC3) engine with a turbocharger, boasting globally perfect after-sales service system, high reliability, long service life, low fuel consumption and less noise. Even if working on the highland of 3000m above sea level, it can ensure that the rated output power remains unchanged. Precise and reliable electronic monitoring system enables operators to know the equipment operation condition in real time. The machine features user-friendly design, comfortable operation and attractive appearance.

According to different working conditions and environments of bulldozers, work equipment like straight-tilt blade, U-blade, R-blade, angle blade and winch can be equipped. Falling object protective structure (FOPS) and roll-over protective structure (ROPS) are optional. In addition, air conditioning system, centralized lubrication system, engine cold start device and automatic track tensioning device are available to meet different users' demands. This bulldozer is widely used in the earthwork constructions of building, roadbuilding, water conservancy, agriculture and national defense.

ZD220-3 bulldozer for hot area is equipped with air conditioning system and water tank specially designed for desert areas. Special ventilation and heat dissipation design is made for the engine protective cover. The UV protective film for cab window and UV protective layer for hose are optional. It can work in about 50°C high-temperature environment.

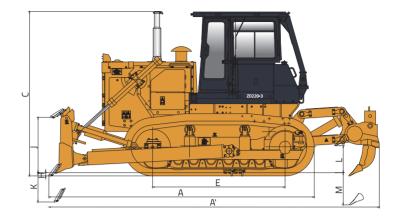

ZD220 (L)-3 bulldozer for cold area is provided with intake preheater, fuel hose and fuel filter heating jacket with heating function, cab with double-glazed window, heater, large-capacity battery resistant to low temperature and seals of cold-resistant materials. It can work in -35°C low-temperature environment.

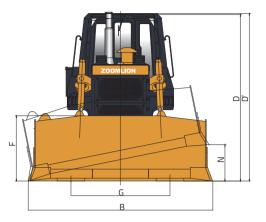

ZD220S (H)-3 swamp bulldozer is provided with the triangular-shaped track shoe, featuring tiny ground pressure. It can be equipped with a large-capacity blade which is suitable for working on soft soil such as wetlands, swamps and landfills.

ZD220F-3 bulldozer for forest area is equipped with a six-post roll-over protective structure (ROPS) and hydraulic or mechanical winch. Work equipment like extended ripper rack and straight-tilt blade with guard bar are optional. It is suitable for working in forest exploitation areas.
